Weather Tight Warranties are only available for commercial projects.

WTW requires Pac HT underlayment.

1 1/2" Snap On Metal Roofing Panels feature a 1-1/2" leg height and a continuous interlock for improved structural performance and wind resistance. A concealed fastener clip system allows for thermal expansion/contraction while providing extraordinary hold-down strength.

A minimum 3:12 slope

Oil Canning is not a reason for rejection. Must sign oil canning waiver when ordering smooth panels.

Snap On Metal Roofing Panels are intended for use in roofing, mansard, and fascia applications. Substrates may include 5/8" (min.) plywood, nailboard insulation or equal with an underlayment of ice and water shield. Other substrates may include metal decking, purlins or rigid insulation in conjunction with bearing plates
