Weather Tight Warranty Not Available on Wall Panels

Flush panels are designed for wall, fascia and soffit applications where a flush or flat appearance is desired. A rounded interlock leg and concealed fastening system improves the flush appearance while providing additional strength. Panels are factory-formed to length to minimize field cutting. Maximum panel length is 25' and minimum panel length is 4'.

The Flush panels are available with optional pencil ribs. Pencil ribs are recommended for longer panel lengths. One or two ribs are available.
